

# ABSTRACT

A photocured crosslinked-hyaluronic acid gel, which has a storage modulus ( $G'$ ) of from 50 to 1500 Pa, a loss modulus ( $G''$ ) of from 10 to 300 Pa, and a tangent delta ( $G''/G'$ ) of from 0.1 to 0.8 in dynamic viscoelasticity at a frequency of 10 Hz, and which is a hydrogel obtained by irradiation with ultraviolet rays of a photoreactive hyaluronic acid derivative in which a photoreactive crosslinking group is chemically linked to a functional group of the hyaluronic acid and crosslinking of mutual photoreactive crosslinking groups, methods for preparing the same, and uses thereof as biomedical materials.
